

PROGRAM LIST

GROUP OUTINGS

Team Olympix

Teams win points through a series of lively games that reward teamwork not athleticism. Teams can battle against each other as newly-formed countries or compete together under one team flag.

Team Survivor

No one gets voted off the island here, but teams or tribes must navigate together through some fun adventure challenges or they can elect to engage in survival of the teamwork fittest.

Great Escape- "Meltdown"

During a tour of the GDY Nuclear Energy Plant your group finds itself in the middle of a nuclear melt down. The only means for averting catastrophe is through obtaining clues and codes through a series of team challenges and games in a sequential order. As you solve one challenge, it will help you solve the next until you arrive at the final solution that will keep your group alive.

In It to Win It

Unlike the TV show with a similar name, it's "teams versus teams" in this wacky competition featuring the most unusual and amusing games ever created.

Amazing Journey

A scavenger hunt at its heart, this event has teams earning clues through humorous challenges that take them to interesting places and eventually across the finish line.

Ropes Adventure

When teams want to be challenged both physically and mentally, this event combines our more extreme ropes course elements requiring both athleticism and teamwork for teams to achieve success. The program can be facilitated as a competition among teams or a collaborative program.

Pick Your Play

Imagine a BIG playground for adults with exciting activities from which to choose like bow tag, black light sports, inflatables, jumping pillow, gaga ball, human foosball, climbing trees, nine square in the air, table games, lawn games, pedal carts and one of the largest indoor ropes courses in the country. These activities may be facilitated as "all play" or "play by choice" depending on what kind of event you choose. Some may want everyone to engage in the activities while others may want a more social occasion for their groups where members can choose to play or watch.

Bikes for Kids

Teams collect the tools and parts to build the bikes through fun and interactive challenges that bond your teams while enabling some economically disadvantaged youth to experience the joys of bike ownership.

Food Share

The goal is to build the tallest freestanding food tower or create a food sculpture using cans and boxed goods gathered through a series of enjoyable team games. The real winners are the charitable food pantries that are replenished with the donated items.

School Packs

School supplies are a necessity for learning and the packs to carry them are a must. Teams compete or collaborate in fun team challenges to gather the needed supplies to build the school packs that eventually end up on the backs of kids who really need them.

Toys for Kids

For hospitals, foster homes and programs for the underprivileged, toys are needed year-round for the kids in their care. Teams engage in a fun series of games and challenges to gather the toys that soon brighten the lives of the kids who receive them.

TEAM DEVELOPMENT

Team Challenge

A customized event that provides discovery about teams through competitive or collaborative activities. Groups pick the areas that need improvement, and Group Dynamix designs the program to address them. A fun, enlightening experience facilitated with brief conversations after each activity.

Team Lab

To reach higher levels of performance, teams are challenged through “action learning” activities to make discoveries about themselves, experiment with new ways of thinking and then apply what they learn. The labs are customized to address the obstacles that keep groups from being more unified and productive teams.

Games We Play

Several times each year, we offer workshops that essentially give away some of our most popular group games and challenges. Our mission is to equip group leaders with fun tools that help their members connect better.

Train the Trainer

To provide resources to those in companies and organizations responsible for developing their teams, we invite respected authors and speakers to present workshops in areas related to team building and leadership.

Team Topics

We provide topical workshops for groups that are seeking to improve their understanding and practice in areas like communication, collaboration, innovation, performance, productive relationships, and leadership. These events are customized to the needs of the group and may be organized as informal “lunch and learn” sessions or more formalized training programs.
